Computer Standards & Interfaces 14 (1992) 533–534
North-Holland

# Author index to volume 14 (1992)

**Andersen, J.J.**, Communicating in a multilingual world 327–332
**Asker, B.**, Information Technology standards, a scarce resource 275–276

**Bauer, M.A.**, *see* **Marshall, A.D.** 191–208
**Benford, S., M. Turoff and J. Palme**, An ISO standard to support asynchronous group communication 363–373
**Berg, J.L.**, Open systems and/or standards 183–184
**Berg, J.L.**, Software internationalization 1
**Berg, J.L.**, The most important information technology standard 361
**Berg, J.L.**, Topics planned for future issues 273
**Berg, J.L.**, Unification standards 91

**Casanova, P., A. Leone and F. Tangorra**, The implementation of a standard IRDS repository for the TASIS software engineering environment 277–295
**Chalupova, I.**, Remarks on implementation of Czech and Slovak languages in computers 101
**Chutatape, O.**, *see* **Teo, C.-Y.** 415–421

**Das, A.**, *see* **Kurokawa, A.** 375–391
**Do, J., N.T. Nhàn and H. Nguyên**, A proposal for Vietnamese character encoding standards in a unified text processing framework 3– 12
**Dssouli, R.**, *see* **Kurokawa, A.** 375–391

**Farrés, J.**, Classifying electronic data interchanges 13– 21

**Gillman, R.**, Coloured Books transition to OSI 23– 28

**Hakozaki, K.**, The PC Open Architecture Developers' Group – An overview 443–444
**Hogrefe, D.**, On the development of a standard for conformance testing based on formal specifications 185–190

**Kilov, H.**, Two approaches to information modeling standardization: Managed objects for the OSI management information service and Object data management reference model 231–238
**Kim, K.**, A common approach to designing the Hangul code and keyboard 297–325
**Kim, K.**, A future direction in standardizing international character codes — with a special reference to ISO/IEC 10646 and Unicode 209–221
**Kurokawa, A., R. Dssouli and A. Das**, A design framework for highly available communication systems 375–391

**Leone, A.**, *see* **Casanova, P.** 277–295

**Mao-Jiang, W. and C. Tian-Qing**, Computer multilingual information processing and multicharacter set computer 29– 34
**Marshall, A.D. and M.A. Bauer**, On the feasibility of ISO FTAM-based file servers to implement a heterogeneous file system 191–208

**Nguyên, H.**, *see* **Do, J.** 3– 12
**Nhàn, N.T.**, *see* **Do, J.** 3– 12

**Oksala, S.P.**, Master plan (strategic): Accredited Standards Committee X3 – Information Processing Systems 103–116
**Ozkul, T.**, Toward a standardized data acquisition interface 333–337

**Palme, J.**, *see* **Benford, S.** 363–373
**Pangalos, G.J.**, Standardization of the user interface 223–229

**Qu, H.**, A method for testing MAP application interface 393–399

**Sarikaya, B. and A. Wiles,** Standard conformance test specification language TTCN 117–144
**Sarikaya, B. and R. Yilmaz,** International and Turkish information technology standardization 401–409
**Sloane, A.,** Electronic data interchange and structured message usage 411–414

**Tan, C.-H.,** *see* **Teo, C.-Y.** 415–421
**Tangorra, F.,** *see* **Casanova, P.** 277–295
**Teo, C.-Y., C.-H. Tan and O. Chutatape,** Generalized interface handler and multi-tasking operation in MS/DOS for PC-based SCADA system 415–421
**Tian-Qing, C.,** *see* **Mao-Jiang, W.** 29– 34
**Turoff, M.,** *see* **Benford, S.** 363–373

**van Antwerpen, H.,** EDI conversion: EDIFACT to in-house file, or database to database? 423–432

**Wichmann, B.A.,** Requirements for programming languages in safety and security software standards 433–441
**Wiles, A.,** *see* **Sarikaya, B.** 117–144

**Yilmaz, R.,** *see* **Sarikaya, B.** 401–409
